Improvement Roadmap & System Recommendations

Generated: 02 May 2026

Petty Cash vs. Session Expense - Will it Double-Count?

Short answer: It will NOT double-count in the P&L, but there is a tracking gap.

- Petty Cash expense posts a journal entry (Dr Expense 6600 / Cr Petty Cash 1010). Hits P&L immediately.
- Session Expense (allowance, mobilisation, accommodation) is stored only for session profitability. It does NOT auto-post to the General Ledger / P&L. So your finance reports are not double-counting.

The Gap

When you look at a specific session, you see RM 500 expense but there is no link telling you that RM 500 was already paid via petty cash. For audit clarity and reconciliation, this should be linked.

Recommended Fix (Phase 1)

- 1) Add an optional linked session id field on petty cash expenses.
- 2) When recording a petty cash expense, dropdown to pick a session (optional).
- 3) Auto-tag the matching session expense as 'Paid via Petty Cash' so coordinator and finance instantly see the money is already disbursed.
- 4) New report 'Petty Cash by Session' to see total petty cash spend on each training.

Comprehensive Phased Improvement Roadmap

Phase 1 - Foundation Fixes (1-2 weeks)

Critical correctness + small wins

- Petty Cash and Session linkage - eliminates the tracking gap.
- Digital Signature embedding everywhere (Invoices, Receipts, Payslips, EA Forms, Indemnity Forms, Trainer Contracts).
- Class-level fpdf2 safety on Invoice and Receipt PDFs (same bulletproof override applied to quotations).
- Test credentials hardening - strip from deployment via gitignore (already done).

Phase 2 - HRDCorp Grant Workflow (2-3 weeks)

JD14 generation + Supervisor sign-off + Claim register

- Client record extension: HRDCorp employer flag + employer code (MyCoID).
- Quotation extension when client is HRDCorp eligible:
 - > Capture grant id (company code plus grant sequence).
 - > Capture total grant amount claimed.
 - > Capture programme certified id (HRDCorp programme code).
- Auto-generate JD14 PDF (HRDCorp standard claim form) populated from session data:
 - > Trainer details, dates, attendance, hours, fees breakdown, training mode.
- Supervisor portal (new role wiring):
 - > Receives JD14 in their queue.
 - > Signs digitally or uploads scanned signed copy.
 - > Returns to admin for HRDCorp submission.
- Status tracker: pending supervisor, signed, submitted to HRDCorp, approved, claimed.
- Claim register report - all grants claimed, pending, approved per year.

Phase 3 - Notifications & Sharing (1 week)

Day-to-day plumbing your business needs

- Resend email integration (need Resend API key) - auto-email quotations, invoices, receipts, certificates, JD14, payslips.
- WhatsApp share links - click-to-share PDFs via wa.me deep links.
- Email-on-event triggers:
 - > Quotation accepted -> auto email finance to raise invoice.
 - > Invoice issued -> auto email client.
 - > Payment received -> auto email receipt.
 - > JD14 signed -> auto email admin.

Phase 4 - Trainer Contract Workflow (1 week)

- Generate freelance trainer contract PDF (rate, scope, NDA, indemnity).
- E-sign flow: trainer signs digitally then admin counter-signs.
- Auto-attach signed contract to trainer's profile.

Phase 5 - Post-Training & Continuous Improvement (2 weeks)

- 3-month and 6-month follow-up surveys sent automatically.
- NPS / CSAT dashboard for management.
- Programme effectiveness scoring (compare pre/post-training feedback).

Phase 6 - Refactoring & Scale Prep (2 weeks)

- Break down sessions module (2300+ lines) into focused files.
- Extract HTML print templates from Marketing Dashboard (1700+ lines) into print utilities.
- Add automated regression tests for finance journals, quotations, payment reversals.

Phase 7 - Multi-Tenancy + Monetisation (4-6 weeks)

Only if you plan to offer this as SaaS

- Tenant model + per-tenant settings and branding.
- Stripe (or Razorpay / Billplz for MY) subscription billing.
- Per-plan feature gating (Free / Pro / Enterprise).
- Onboarding wizard for new training companies.

Phase 8 - Mobile & Field Operations (2 weeks)

- Capacitor wrapper - publish iOS/Android app stores.
- Offline-first trainer checklists and attendance.
- Native camera receipt scan + OCR (auto-extract amount and date for petty cash).
- Push notifications for approvals and sign requests.

Recommendation

Start with Phase 1 (Petty Cash linkage) - it directly answers your immediate concern and gives instant value. Then move to Phase 2 (HRDCorp and Supervisor flow) since it is revenue-relevant. Phases 3 and 4 add daily efficiency gains. Phases 5-8 are scale-up plays for when you decide to grow into multiple companies or mobile-first operations.
